## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art searched and cited failed to teach or fairly suggest a vaporizer to deliver a vaporized source into an ionization chamber of an ion implantation apparatus comprising a nozzle having a gas inlet port formed in upward orientation located a predetermined distance downward from an upper end of an inner surface of a crucible for vaporizing the solid source therein. The said predetermined distance being so that the vaporized source is delivered from the crucible to the ionization chamber through the gas inlet port of the nozzle even though a pressure difference between the crucible and the ionization chamber is small in combination with the remaining elements of claim 1. Claims 2-7 are allowable because of their dependencies upon claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent publication 2002/0070672 (Horsky) contains art similar to that being claimed by applicant, more specifically, vaporizers for use in ion beam systems and methods.
